

Policy statement on conflict minerals

As a socially responsible company, Voronet S.L has concern for the well-being of people and communities. We conduct business fairly and ethically, respect human rights, comply with laws and regulations, and follow a rigorous Code of Conduct. Voronet supports the efforts of human rights organizations to end violence and atrocities in Central Africa (the Democratic Republic of Congo (DRC) and nine adjoining countries: Republic of Congo, Central Africa Republic, South Sudan, Zambia, Angola, Tanzania, Burundi, Rwanda and Uganda).

It has been widely reported that the major driver of this violence is the natural abundance of the minerals tin, tungsten, tantalum and gold, now referred to as “conflict minerals.” Armed groups fight for control of mines in this region and use forced labour to mine and sell the minerals, which in turn funds ongoing violence.

In August 2012, the United States Securities and Exchange Commission (SEC) approved the final rule regarding the sourcing of conflict minerals as defined in the Dodd-Frank Wall Street Reform and Consumer Protection Act, Section 1502. Under this rule, publicly traded companies must report annually to the SEC the presence of “conflict minerals” originating from Central Africa in either the products they manufacture or contract to manufacture or use in the production process. Voronet will file the necessary documentation prior to the regulation deadlines.

We have initiated a process that meets the Organisation for Economic Co-operation and Development (OECD) framework to comply with this regulation. This includes establishing compliance requirements for our direct suppliers regarding conflict minerals, implementing controls and reporting, undertaking appropriate sourcing efforts, and providing our customers the data necessary to facilitate their SEC reporting.

Voronet will align its efforts to practices established by industry peers – including the Electronics Industry Citizenship Coalition (EICC) and Global e-Sustainability Initiative (GeSI) – to enable companies to source conflict-free minerals. V11, November 2013 Expectations for Suppliers In support of Ecolab’s policy on conflict minerals, suppliers are expected to supply materials to Voronet that are “DRC Conflict-Free”.

Suppliers are expected to adopt policies and management systems with respect to conflict minerals and to require their suppliers to adopt similar policies and systems. Voronet expects suppliers to establish their own due diligence program to ensure conflict-free supply chains. In the event Voronet determines that a supplier’s efforts to comply with this Policy have been deficient and the supplier fails to cooperate in developing and implementing reasonable remedial steps, Voronet reserves the right

to take appropriate actions up to and including discontinuing purchases from the supplier.

Under the definition of “DRC Conflict-Free,” products supplied to Voronet:

- Do not contain tantalum, tin, tungsten or gold (3TG) as elements necessary to their production or functionality.
- If products supplied to Voronet do contain these minerals, the minerals must originate outside the DRC, come from scrap or recycled sources, or be supplied from smelters that have been validated by an independent private sector party to be conflict-free.

Certified conflict-free smelters are validated as compliant to the EICC (Electronic Industry Citizenship Coalition) conflict free smelter (CFS) protocol using the CFS Compliant Smelter List.

Through the CFS protocol, smelters are audited globally; the list of compliant smelters and refiners is posted at www.conflictreesmelter.org.

Voronet will survey direct suppliers as a part of our conflict minerals due diligence program. Suppliers are expected to respond in to survey requests in a timely manner, and with full disclosure following the specific instructions provided.

Eduard Papell
Voronet CEO
